

One's Health

Your health is our One and Only Obsession

PROFILE

www.oneshealth.co.uk

ONE'S HEALTH as a brand of Kenyan Registered Hollbros (K) Limited, was founded in 2017. One's Health is a forward-thinking, healthcare conscious Organization set up with the aim of providing quality healthcare remedies and supplements, sourced in Kenya, for those people looking for additional natural power packed products that will assist them with a healthier lifestyle. It is our mission to source the highest quality of locally produced health remedies and supplements that are proven to have only positive effects on the body and mind. All the products that we promote are certified by Kenya Bureau of Standards (KEBS), Kenya Poisons Board and all other regulatory bodies that ensure product safety and export / import compliance.

ONE'S HEALTH are wholly committed to promoting sustainable development and self help groups in the Country. With our main focus being on the promotion of pure health related produce, we strive to source these products from local communities that directly benefit from the sale of these goods at the grass roots level.

We are likewise wholly committed to our Corporate Social Responsibility Pledge which undertakes to contribute a percentage of our turnover annually to our selected Charity – Dagoretti Corner Child Care Programme, a very needy orphanage located in Nairobi, Kenya.

OUR CURRENT RANGE OF ORGANIC HEALTH PRODUCTS FROM KENYA

Kenya Health Supplements — Kenya has a very rich and diverse ecosystem. With its location on the equator and having forests, deserts and an ocean, she boasts many plants and trees that have spectacular nutritional value. Some of these include (but are not limited to) the Baobab Tree, the Moringa Tree and the Neem tree. All of these produce leaves and roots that are packed with nutrients and minerals that can be used in our daily diets to provide us with that extra health kick. We are pleased to be partnered with My Nawiri, located on the South coast of Kenya, who produce an amazing range of health supplements.

Kenya Skin Care Products — My Nawiri also offer a unique range of skin care products that are fortified with these health supplements. Our Shea Butter range includes bees wax, baobab and honey, while the Bentonite Clay Natural Skin Glow range includes Neem, Tumeric, Spirulina and Baobab. Healing clays like bentonite have a high concentration of minerals including silica, calcium, magnesium, sodium, iron, and potassium. They also absorb and remove toxins, heavy metals, impurities, and chemicals from our skin.

Kenya Tea and Coffees — MADE IN KENYA - Bio-degradable pyramid tea bags and Nespresso compatible and compostable capsules. Kenya is one of the world's top producers and exporters of tea. Because pure Kenya tea is very superior in quality compared to other teas of the world, most tea exported from Kenya is sold in blended form - it's used for blending with other teas to produce some of the popular blends available in grocery stores across the United States, Europe, Asia and other markets.

Alongside our range of Kenya health remedies, supplements and teas, we are happy to be promoting a special brand of quality Kenyan coffees. Kenyan coffees are well sought after the world over due to their origins on the foothills of Mount Kenya. Kenyan coffee has a strong, distinctly bold flavour and a high, smooth acidity with a mellow after-taste similar to wine. We hope that our coffee will be well received and bring much enjoyment to coffee connoisseur's all over the European Continent.

OUR MISSION — To source locally produced health remedies and supplements from Kenya that are of International standard and export quality, by teaming up with people who are faithful to our core values and by:

- Understanding our customer's needs, so as to design or adapt our products and services accordingly.
- Creating win-win scenarios with our customers.
- Offering cost effective health remedies.
- Ensuring that all proceeds from the sale of our remedies benefit the local Kenyan communities at a "Grass Roots Level".
- Reviewing our policies and procedures so that we continually focus on meeting the terms of our Mission.

In the process we expect to learn from our customers and to adjust our approach accordingly, so that in time we become the preferred supplier in our market place.

OUR VISION - To create an Organization that is recognized in all its facets, as the best available in the marketplace, providing health and wellbeing outlets with affordable health remedies and supplements for chronic diseases. We are unwavering in our commitment towards life-long learning, so that we continually expand our knowledge and experience base as individuals and as a team. We will be generous in sharing all that we can usefully pass on, so that with candour and confidence we may describe ourselves as a "contributing organization".

OUR PEOPLE — Our logic is to create an Organization whose members are proud to be part of Ones Health. We recognize that our people are the source of our strength and that no part of our mission statement can be accomplished without their commitment and loyalty. They determine our reputation, vitality and performance. We will therefore develop mutually rewarding relationships that are grounded in open, accurate and timely communications. Teamwork and mutual trust will be the route to enhanced productivity and business performance. Furthermore, we will provide our people with the means to personal development through career progression and through training programs. We will listen to their views about the conduct of our services, the organization and our performance in general.
